**PATTERNED LINOLEUM SHEETING**

***Detailed Action***

1. Applicant's request for continued examination filed October 27, 2010, was received. Claims 1, 2, and 11 were amended. Claims 25 and 27 were cancelled.

***Examiner's Amendment***

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the claims:

Cancel withdrawn claims 15, 16, 29, and 30, these claims being drawn to a non-elected invention.

***Claim Rejections—35 USC §103***

3. The rejections under 35 U.S.C. 103(a) of claims 1-4, 6-14, 17-24, 26, and 28 as being unpatentable over Markmann et al. (DE 199 15 868) in view of Humphreys et al. (US 1,873,587) and additional references are withdrawn because independent claims 1, 2, and 11 have been amended.

***Reasons for Allowance***

4. The following is an examiner's statement of reasons for allowance: The claims are found allowable because the prior art does not teach a method of producing patterned linoleum sheeting by applying a solution, paste, suspension, or dispersion of non-linoleum material as a flat layer upon or into premade recesses within a green linoleum sheet, cutting the resulting green linoleum into pieces of finite length, layering the cut pieces into a stack, and calendering the stack into patterned linoleum sheeting, where the non-linoleum material is metallic or a pigment differing from any pigment used in the green linoleum. While Markmann et al. teach making linoleum sheeting by a process including the claimed steps of manipulating only linoleum material, and while Humphreys et al. teach mixing metal powder or mica flakes into a raw linoleum mixture to produce attractive effects in the finished linoleum sheeting, the prior art does not teach applying non-linoleum metallic or pigment materials already in the form of a solution, paste, suspension, or dispersion as a layer atop or into premade recesses within a green linoleum sheet before cutting, stacking, and calendering the green linoleum sheet. Hence, it would not have been obvious to one of ordinary skill in the art to modify the method of Markmann et al. and Humphreys et al. to arrive at the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
